

ALTS - Making a significant, positive difference educationally

ALTS is making a significant, positive difference educationally through professional development for teachers, corporate trainers and professors. Our professional development webinars and workshops are unique because apart from giving you the hands-on experience of making effective assessments, we provide you with a software tool to guide you through the process in the future and save your work in a secure, well organized computerized system.

With this software you can put your own assessments online and after your students take the assessment, you can find out what questions worked and what did not at the press of a single button. There is color coded guidance for identifying questions that need to be fixed.

Through our products and services, ALTS answers the question: "How can we use education, educational assessment, and educational policy to make the world a better place?" -- A better place for every learner, every teacher, every parent, every employer, and every educator.
